INSTRUCTIONS TO CONTRIBUTORS FOR THE PREPARATION OF MANUSCRIPTS

Accepted papers will be returned to the senior author with full typing instructions and a quantity of typing sheets. Authors preparing manuscripts for submission should ensure that their typist accurately follows the instructions given below.

Typing Instructions

(1) Type manuscripts (double spaced) on good quality, white bond paper. Submit an original *plus* two copies for review.

(2) The title should be all in CAPITAL LETTERS, centred on width the of page 1. After one line space, type the author's names and addresses on separate lines, Capitalizing the First Letter of All Main Words.

(3) Other headings throughout the paper should be arranged to increase clarity. Major headings, e.g. Methods, Experimental, Results, References, etc., should be typed in capitals and lower case letters, centred on the width of the page and underlined. Other headings should be arranged to indicate their relative importance.

(4) *Tables should be typed as part of the text*, but in such a way as to avoid confusion with the text. the word TABLE should be capitalized and centred with the table number above the table. The caption should have the first letters of all main words in capitals. Authors should use discretion to ensure that a single table does not overlap onto the next page.

(5) Any material that cannot be typed, such as symbols and formulae, should be inked carefully in black.

(6) Glossy prints of all figures should be supplied in the actual size to be reproduced in the Journal. These should be located, **but not cemented** in the appropriate place in the text above descriptive caption. Again ensure that the caption does not become confused with the text. The abbreviation FIG. should be capitalized and, with the figure number, centred above the caption. The caption should be typed single spaced.

(7) Number each page.

(8) Footnotes should be typed single spaced at the bottom of the appropriate page and separated from the text by a short line immediately above.

(9) References should be indicated in the text by consecutive numbers in parentheses thus: (1,2); the full reference being cited in a numbered list at the end of the text. References should contain the names of *all* the authors of any one paper together with their initials, the title of the journal (abbreviated if possible in accordance with the *World List of Scientific Periodicals*), volume number, first page number and year, as illustrated below. References to books should contain the publisher's name and location.

1. H. W. KEWITZ, I. B. WILSON and D. NACHMANSOHN, Archs Biochem. Biophys. 64, 456 (1956).
2. S. T. YOFFE and A. N. NESMEYANOV, Handbook of Magnesium-Organic Compounds, p. 380. Pergamon Press, London (1956).

(10) Use only standard symbols and abbreviations in text and illustrations.

Reprints

A reprint order form will be sent to the author after acceptance. Please return this form directly to Pergamon Press, Oxford to ensure that your reprints are sent to you after publication of the issue, and to avoid incurring additional charges in their reproduction.

Mailing of Communications

Contributors outside of the U.S.A. should submit their manuscripts to the nearest Regional Editor; contributors in the U.S.A. should submit their manuscripts to the office of the Executive Editor, or the nearest Regional Editor.
